Mehul

SR. JavaScript Developer
8+ years of experience

About Me

I've always had a passion for technology and software development, and I'm thrilled to have the opportunity to work in this field. I enjoy tackling complex technical problems and working collaboratively to find solutions. I am an Experienced JavaScript Developer (React JS, Gatsby JS, Next JS, Vue JS, Styled Component, Styled System, Tailwind CSS, JavaScript, Material UI, Materialize CSS, HTML5, CSS, CSS3, SCSS, WordPress).

Skills

Next.Js	Redux	Azure	Vue.Js
MaterialUI	GraphQL	Gatsby.JS	ReactJS
MongoDB	Python	Node.Js	PHP
WordPress	SCSS	CSS	

Projects

On24 - Webinar Software
Technologies: Python Fast API, React JS, Styled Component, Opentok JS Role: Senior Frontend Developer
Role: Senior Frontend Developer
Team Size: 5
Project Description: Host breakout rooms for your audience to participate in Q&A, network with their peers, or meet 1:1 with your sales team. Connect with your audience in an intimate setting with two-way audio and video experiences.
My Roles & Responsibilities:
● Create and design components for Breakout Room using styled-components and style system
● Implement video and audio calling features using Opentok js
● Make all the components and pages device and browser-compatible
● Create Unit test case for breakout Room components.

Accelerate
Technologies: React JS, Python, FastAPI, AWS(Cognito, Appsync, Lamda, API Gateway), MongoDB, Open AI LLM, LangChain
Role: Senior Frontend Developer
Team Size: 14
Project Description: The Educo accelerate is AI driven platform using which recruiters helps international students to achieve their academic and career goals. It provides recruiters diversified educational institution listing, helps to manage student information and documents, suggests the best fitted courses for the students using their educational history, and mellows the process of student application to student enrolment in the institutions.

My Roles & Responsibilities:
● Optimized ReactJS forms and components to improve UX.
● Created an Admin site using ReactJS and GraphQL APIs in AWS Appsync
● Collaborated with ML developer to develop course recommendation service from student academic history using Python and deployed using AWS Lambda, and API Gateway.
● Agent Conversation chatbot development.

Bobtrade - Construction Marketplace
Technologies: React JS, Node JS, Material UI
Role: Senior Frontend Developer
Team Size: 12
Project Description: Bobtrade is a construction procurement platform to buy and sell building materials. It develops an innovative and easy-to-use online marketplace and offers builders and merchants a platform that makes their lives simpler, so they can focus on building the future. The platform connects builders and merchants to help builders save both money and time and merchants increase their sales.

My Roles & Responsibilities:
● Main worked on frontend part (React, redux, Material UI, SCSS)
● Created store using redux state management library
● Built all UI components using the Material UI framework
● Customize material UI components and Make pixel perfect design
● Wired the API and managed all the data using redux.

Prayin - Booking app designed for Places of Worship
Technologies: React JS, Next JS, Node JS, Material UI, Firebase
Role: Senior Frontend Developer
Team Size: 4
Project Description: Prayin.io is a free booking app designed to allow Places of Worship to reopen while keeping social distancing measures in order to stop the spread of COVID-19 (coronavirus).

My Roles & Responsibilities:
● Main worked on frontend part (React, Next, Material UI, SCSS)
● Built all UI components using Material UI framework and next JS
● Customize material UI components and Make pixel perfect design
● Implement multi-language functionality and RTL design
● Configure Firebase and use the Firebase function to save and retrieve data in the Next JS app.

Searchbar World
Technologies: React JS, Next JS, Tailwind CSS
Role: Senior Frontend Developer
Team Size: 10
Project Description: Search Bar World is a platform that provides brands and products that meet your impossibly high standards.

My Roles & Responsibilities:
● Main worked on frontend part (Next JS, Tailwind CSS, SCSS)
● Build Components and pages using Next Js and tailwind CSS
● Build custom hooks
● Created API handler for API calls
